SMOKE BELCHERS ARE PHOTOGRAPHED

Inspector Jones Will Introduce Pictures in Prosecutions This Week.

Photographs of ten offending smoke beichers have been taken under the direc-tion of Charles H. Jones, Smoke Inspector, to be offered in evidence in the prosecutions which Mr. Jones promises will be instituted

'this week.' Yesterday Mr. Jones called upon Harry . Clover, the Prosecuting Attorney at the Court of Criminal Correction in reference to the cases he proposes to bring against violators of the smoke law. The warrants will be issued by Richard M. Johnson, Assistant Prosecuting Attorney, who was waited upon by Eugene McQuillin, secretary of the Citizens' Smoke Abatement Associa-

waited upon by Eugene McQuillin, secretary of the Citizens' Smoke Abatement Association.

At the meeting of the Citizens' Association Monday it was decided that certain members should see Mayor Wells informally and call his attention to the delays in the enforcement of the smoke law. It was stated yesterday that the Mayor was seen and the order given to push prosecutions without any more "dilly-dailying."

Inspector Jones promises to confer with Secretary McQuillin of the Smoke Abatement Association to-day and arrange the final details of evidence to be presented in the first prosecutions. William H. Bryan, consulting engineer of the association, has offered his services gratis in visiting the various plants and testifying that in any case smoke can be readily abated.

"On every clear day since the first of April," said Inspector Jones yesterday, "we have been taking photographs of the bad plants. To-night I have pictures of each plant and enough in each instance to show to what extent the smoke belcher is a nuisance. Some of the snap shots were taken at the mouth of the stack, and the others from one to three blocks away."

These photographs will be placed in evidence to comply with that phrase in the law which requires it to be shown that "dense smoke" is being emitted. Another most important feature in the law is the paratraph exempting persons who can prove that smoke from their particular plant "cannot be abated."

"Among the ten plants we have photographed," said the Smoke Inspector, "there is not one that could not get rid of smoke

cannot be abated."

"Among the ten plants we have photographed," said the Smoke Inspector, "there is not one that could not get rid of smoke if they made the proper effort. And to prove this fact I shall call upon practical engineers and fireman who have accomplished smoke abatement in similar plants. When we took the photographs I had my deputles, who are experts, to remain in the boiler-rooms and thereby be prepared to give evidence of the existing conditions, and also testify that in boiler-rooms of the same type smoke has been abated."

Inspector Jones stated that he would confer with the Citizens' Smoke Abatement Association before asking for warrants, for the reason that it may be necessary to have an expert like Mr. Bryan visit the plants and he prepared to cover any technical points that may come up in the promised prosecutions.

The photographs have been taken by Will-

points that may come up in the promised prosecutions.

The photographs have been taken by William E. Rolfe, assistant engineer in the Water Commissioner's office, and W. C. Wood, Mr. Jones's clerk. They began developing the negatives yesterday afternoon. According to the Smoke Inspector's last report there were 152 violators who had not made an effort to comply with the law. Mr. Jones said yesterday that about eighty had since installed devices. This leaves more than eighty who have had warning and are subject to arrest. Heating plants are not included, the Inspector having decided to give these offenders until next fall to put in smoke-consuming devices.

STRANGER KILLED BY POLICE. He Was Heavily Armed and Resisted Officers.

San Antonio, Tex., April 16.—An unknown man about 35 years of age was shot and killed by officers in a saloon this morning about 2 o'clock. His suspicious conduct in the place caused the police to be notified, and Officers Taylor. Harvey and Hughes responded and located the man in a rear room. As soon as the door was open the stranger drew a pistol and Officers Harvey and Hughes grappled with him. He fired at Taylor over Harvey's head, burning the latter's face. Taylor then fired three shots, one of them taking effect in the heart of the stranger, killing him instantly. Officer Harvey was grazed by one of Taylor's bullets. The dead man appeared to be about 25 years old, was 5 feet 5 inches in height, well dressed and weighed about 145 pounds.

When searched two pistols were found on him, also two wallets, one containing \$100 and the other \$240 in currency and \$25 in bills was found in his socks. He had two spectacle cases, one stamped with the name of a Little Rock merchant, and another that of a Beaumont firm. He had no papers about him by which he might be identified.

BANK CLEARINGS ARE HEAVY. Yesterday's Total Second Only to Record-Breaker.

Clearings of the local banks yesterday were second only to those of the banner day in the financial history of St. Louis. The total, as officially reported, was \$11,871.871. The largest clearings were returned on January 2 of the present year, when the total was \$12,441.447. was \$12.441.447.

In explanation of yesterday's figures, it was said that payments of quarterly dividends on many gilt-edged local stocks had served to swell the amount of business done by the banks though the greater portion of the transactions represented were of a strictly routine character. It is believed that if the regular run of spring business bears out its present promise a new record will soon be established.
